August 12, 2019

To: Mayor Peter A. Nystrom and Members of the Norwich City Council through City Manager John Salomone

Estimated Tax Impact of Debt Service on Proposed Bond Ordinance

The purpose of this memo is to give the estimated tax impact on the debt service for the proposed bond ordinance on the agenda for the August 19, 2019 Norwich City Council meeting.

Assumptions

The estimates in this memo make the following assumptions:

- Approval of the bond ordinances by the City Council and Norwich voters
- 4% interest rate on the debt issued
- 20 year amortization for the bond issues
- 0.5% increase in the grand list each year

\$5 Million Infrastructure Improvement Program

The funds for this proposed project would be spent over a series of years. Because of this, the debt service estimates assume that the bonds would be issued incrementally from 2020-2023. Over the first five years, a homeowner with a median valued single-family home would pay an average of approximately \$20 per year in real estate property taxes related to debt service for this project. The annual debt service cost begins to decrease in year three.
